

For best results, locate a suitable site for your fountain that is leveled and provides pleasing viewing angles.

Note: Always follow local electrical codes and use a 110V GFCI protected outlet.

## 4590F5

- 1. Locate a suitable site for your Fountain. Site should be leveled and provide a pleasing viewing angle.
- 2. Locate the base in the center of your site. Cord relief hole on the base will indicate the back of fountain.
- 3. Place the Bowl on top of the Pedestal.
- 4. Feed pump cord non threaded end of the Stand Pipe, then feed cord through the Bowl and Base. Cord will feed through the Cord relief hole on the bottom back of the Pedestal.
- 5. Thread the Stand Pipe to the Bowl. Pull excess cord and have Pump place next to Stand Pipe. Seal Pump cord with Rubber Stopper.
- 6. Connect ADAPTER
  BARB to Pump.
  Connect tubbing to
  adapter on pump.
- 7. As you place the Pump Cover on top of the Bowl, feed the tubbing through it and slip Restrictor.
- 8. As you place the Statue on top of the Pump Cover connect Tubing.
- 9. Attach Brass Umbrella Rod and the Umbrella to the Top Piece AS ILLUSTRATED.
- Fill both basin with water.
   Plug pump into GFCI protected outlet.
- 11. Adjust R1 as necessary to control water flow

-Nozzle

## IMPORTANT - WINTER CARE:

Do not allow water to collect and freeze in fountain bowl(s) or shell(s). Do not allow fountain pieces to sit in a pool of ice. Disassemble entire fountain and pump and store indoors during the winter season.

If you cannot store your fountain indoors during the winter season, you must at least protect it from ice collection or exposure: first, remove the statue(s) and pump, storing them inside if possible. Next, locate the drain plug on the underside of bowl(s) or shell(s). Remove the drain plug to drain any water "trapped" between the walls of the bowl(s) or shell(s). Then fill the bowl(s) or shell(s) with an absorbent material, such as burlap, blankets, etc. Finally, cover the entire fountain with a Henri Fountain Cover. Should condensation droplets form on the inside of the cover, the material will absorb them.

By following these simple and sensible precautions during the winter season, you will protect your fountain for years of beauty and enjoyment!

CAUTION: The use of Chlorine or Chlorine Bleach may damage the finish of your fountain. When cleaning your fountain, it is best to test the cleaning agent on an underside or back surface to determine the agent's suitability. We recommend the use of a mild, non-abrasive treatment, such as Henri Lime Remover and Preventer. To avoid foaming, thoroughly rinse the fountain to remove the entire cleaning agent.
