

For best results, locate a suitable site for your fountain that is leveled and provides pleasing viewing angles.
 Note: Always follow local electrical codes and use a 110V GFCI protected outlet.

5649F9

1. Locate a suitable site for your Barrington In Valencia Fountain, 10 pc. Site should be level and provide a pleasing viewing angle. You should always follow local electrical codes and use a 110V GFCI protected outlet.
2. Locate the #6504 Pool in the center of your site. Bowl must be level.
3. Place PS450 Pump next to Standpipe. Slip pump cord through standpipe and pull cord out from bottom of pool. Seal cord with RS1.5 rubber stopper and corks. Corks will be removed if order AB8740 lights.
4. Connect ADAPTER 3/4" MNPT X 3/4" BARB to pump. Connect NKT3/4" Tubing X 48" to Adapter on Pump. Use CLAMP #56 to secure tubing.
5. As you set #7647 Pedestal in center of Pool feed Tubing through #7647 Pedestal. Measure between other side of base and the pool wall to make sure the base is centered.
6. As you place #6648 Bowl on top of #7647 Pedestal feed Tubing through #6648 Bowl.
7. Connect STP1 X 8" Stand Pipe to #6648 Bowl and feed Tubing through Stand Pipe. Do the same with #7648 Pedestal when placing it on top of #6648 Bowl feed Tubing through.
8. Connect ADAPTER 1/2" X 3/4" BARB on the bottom of #5649 Finial/Bowl.
9. As you place the #5649 Finial/Bowl on top of #7648 slip R1 Restrictor to Tubing and connect Tubing to Adapter from bottom of #5649 Finial/Bowl.
10. Fill all basins and pool with water. Plug pump into 110V GFCI protected outlet.
11. Finally, place the four #9024 Surround Sections around the fiberglass pool and align evenly.

IMPORTANT - WINTER CARE:

Do not allow water to collect and freeze in fountain bowl(s) or shell(s). Do not allow fountain pieces to sit in a pool of ice. Disassemble entire fountain and pump and store indoors during the winter season.

If you cannot store your fountain indoors during the winter season, you must at least protect it from ice collection or exposure: first, remove the statue(s) and pump, storing them inside if possible. Next, locate the drain plug on the underside of bowl(s) or shell(s). Remove the drain plug to drain any water "trapped" between the walls of the bowl(s) or shell(s). Then fill the bowl(s) or shell(s) with an absorbent material, such as burlap, blankets, etc. Finally, cover the entire fountain with a Henri Fountain Cover. Should condensation droplets form on the inside of the cover, the material will absorb them.

By following these simple and sensible precautions during the winter season, you will protect your fountain for years of beauty and enjoyment!

CAUTION: The use of Chlorine or Chlorine Bleach may damage the finish of your fountain. When cleaning your fountain, it is best to test the cleaning agent on an underside or back surface to determine the agent's suitability. We recommend the use of a mild, non-abrasive treatment, such as Henri Lime Remover and Preventer. To avoid foaming, thoroughly rinse the fountain to remove the entire cleaning agent.
